Security Awareness

Our unique and customized approach to Security Awareness Training ensures that your users become best equipped to protect the assets that matter to you the most. Through our experience, we have developed a training methodology which will ensure a high level of confidence and competence.

Everyone Has a Role to Play

Corporations cannot protect the confidentiality, integrity, and availability of information in today's highly networked systems environment without ensuring that all people involved in using and managing IT:

- Understand their roles and responsibilities related to the organizational mission
- Understand the organization's IT security policy, procedures, and practices
- Have at least adequate knowledge of the various management, operational, and technical controls required and available to protect the IT resources for which they are responsible.

Why Now?

A strong IT security program cannot be put in place without significant attention given to training business IT users on security policy, procedures, and techniques, as well as the various management, operational, and technical controls necessary and available to secure IT resources. Failure to give attention to the area of security training puts an enterprise at great risk because security of business resources is as much a human issue as it is a technology issue.

Your Program

Your Security Awareness Training is individually tailored to your culture, policies and vertical industry challenges.

Key Value-Adds

Creative Breakthroughs is set apart in several ways.

Your training is:

- Always custom
- On-site instructor-led, web-based or blended solutions
- Custom discovery—we learn your specific institutions & network infrastructure
- Comprehensive plan & implementation—including creative follow-up activities
- Delivered by industry leaders with decades of IT experience
